

The Practice of Design in the Age of Analytics

Daniel M. Russell, Google
Search quality & User Happiness

My goal...

- ▶ ... is to make your experience better
- ▶ ... to make you smarter, more capable, wiser

- ▶ How can we get there?
 - ▶ Integrate the beauty of analytical data with hardnosed design

-
- ▶ I am not the hardcore hammerheaded Harpy of analytics over design.
 - ▶ I am a pragmatist.
 - ▶ I just want to make the experience better.

insights

- ▶ Intuitions are terrible.
- ▶ In particular, your intuitions are terrible.
- ▶ That's why we do studies.
- ▶ Fallacy #1: "I do it this way"
- ▶ Fallacy #2: "My Mom does it that way"
- ▶ Deep truth: you are statistically insignificant
- ▶ Deeper truth: you're a couple sigma away from the norm
- ▶ ... so are your friends

Our intuitions fail us...

- ▶ No matter what *Blink* claims, our intuitions about web-app design suck...
- ▶ Here's why:
 - ▶ Confirmation bias
 - ▶ Sampling bias
 - ▶ “Natural statistics” errors
 - ▶ Sample sizes too small
 - ▶ ... many other causes...
- ▶ **Invisibility of aggregated end-user behaviors**

Why do all analysis?

- ▶ To understand what our searchers are doing...
 - ▶ *Trials and tribulations*
 - ▶ *Emotional reactions—both positive and negative*
 - ▶ *Root factors driving behaviors*
 - ▶ *In situ understanding of intent*
 - ▶ *Mental models of what they're doing...*
 - ▶ *... and whether or not they're happy with what Google does*

Multiple views of data

- ▶ **Micro:** *lowest level details—milliseconds*
- ▶ **Meso:** *mid-level observations—minutes to days*
- ▶ **Macro:** *millions of observations—days to months*

How we approach the problem

① Eyetracking studies

Studies in the microscopic

② Field studies

Getting out to see what meso-reality is

③ Sessions analysis

What are people doing macro in logs,
bring outside behavior back to
where we can see the signals

1 Eyetracking & usability studies at Google

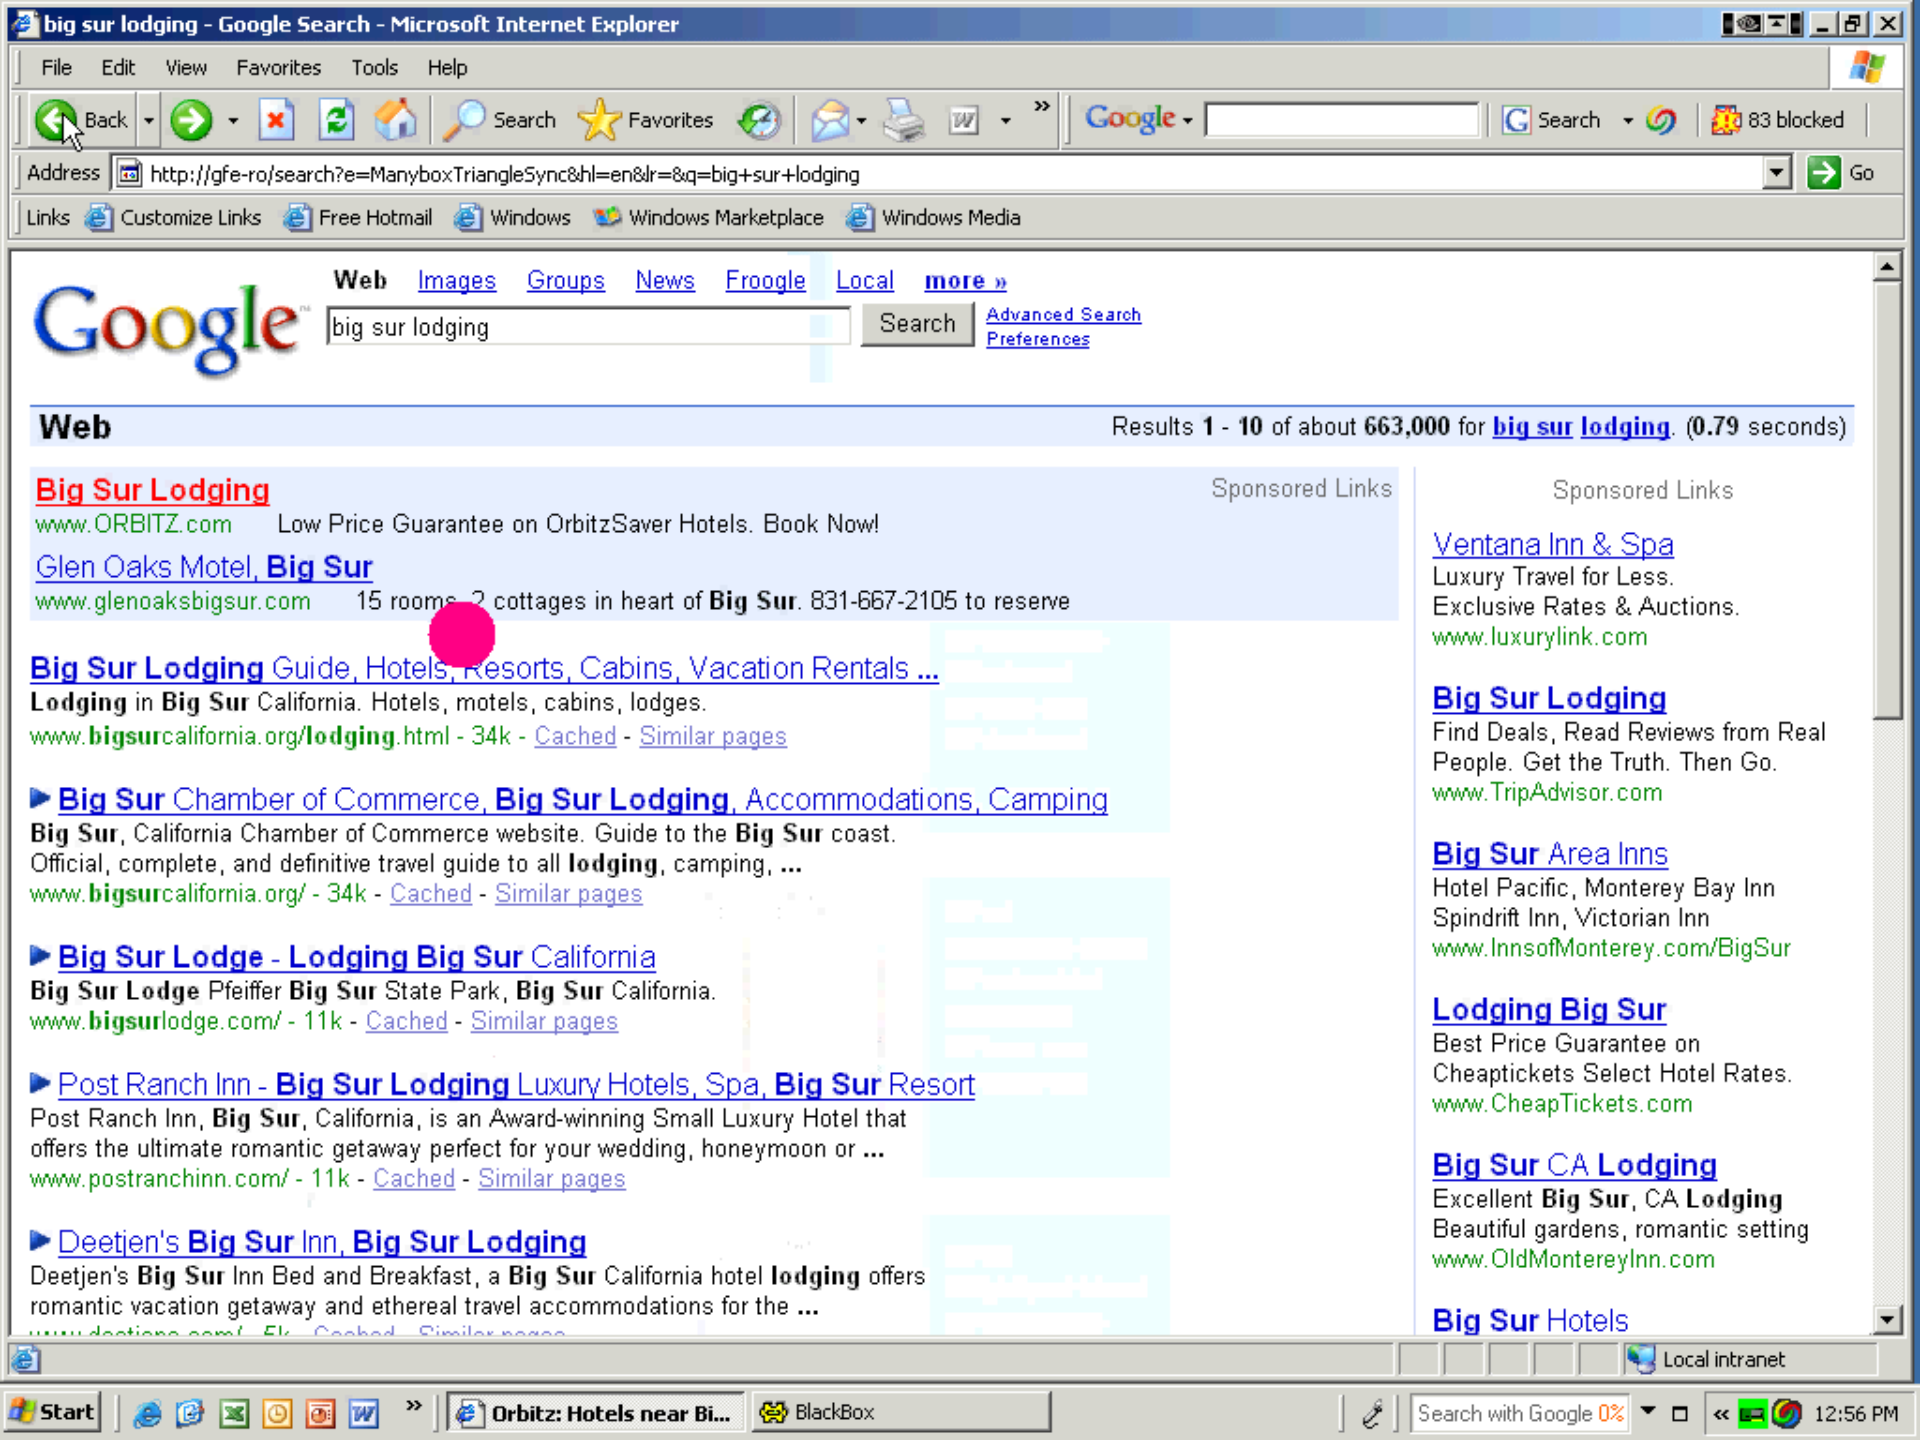

~10-20 / week – typically 3 – 5 observers

- ▶ Testing new, specific features of UI

▶ **Typical studies:**

- ▶ How users perceive a UI change
- ▶ Eyetracking to get at deeper understanding

2 Lies, Truth & Videotape — Field studies

- ▶ Interviews held *in situ*...
 - ▶ Workplace, home, coffee shopany place... must be search-place
 - ▶ Place + context cueing effects
 - ▶ Interested in natural use phenomena (ads, distractions, multiple tasks...)

00:12 [actor most oscars]

00:10 So this is celebrity with most Oscars...
00:11 Actor... ah... most...
00:13 I'm just going to try that...most Oscars...
don't know...
00:19 (reading) "News results for 'actors most Oscars' ...
huh..
00:25 Oh, then that would be currently
"Brokeback"... "prior voices"... "truth in
Oscar's relevance"...
00:32 ...now I know...
00:35 .. you get a lot of weird things..hold on...
00:38 "Are Filipinos ready for gay flicks?"
00:40 How does that have to do with what
I just....did...?
00:43 Ummm...
00:44 So that's where you can get surprised...
you're like, where is this... how does
this relate...umm...
00:45 Bond...I would think...
00:46 So I don't know, it's interesting...
01:08 Dan: Did you realize you were in
the News section?
01:09 Oh, no I didn't. How did I get that? . . .
01:10 Oooh... no I didn't.

1:15 [actor most oscars Academy]

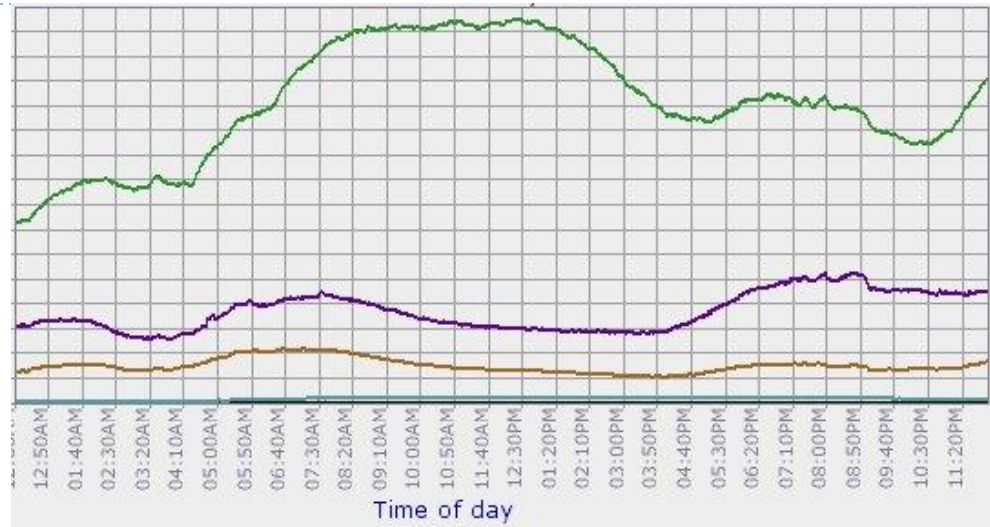

③ Understanding the behavior of the many

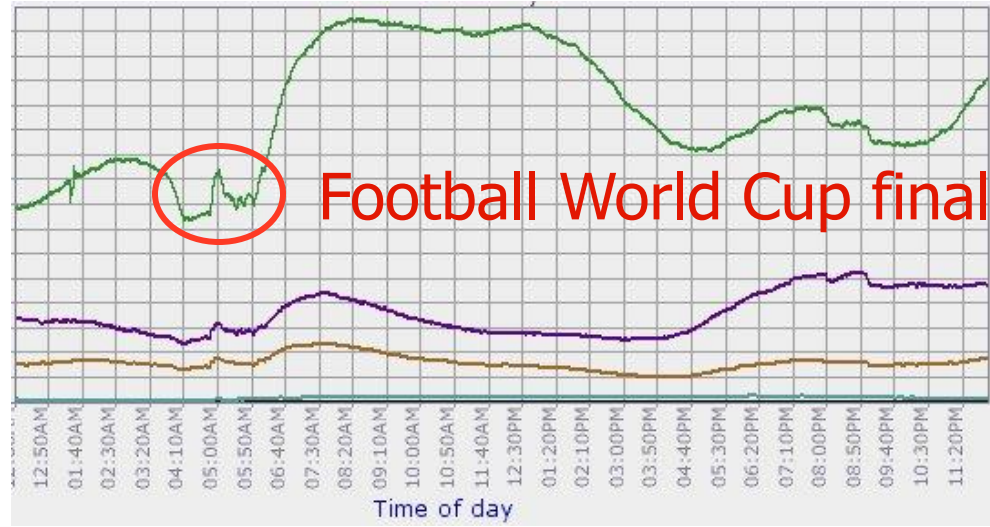

- ▶ **We have a lot of data: many TB weekly in logs**
- ▶ **How to analyze it?**
- ▶ **How does this drive design?**
 - ▶ **When we run experiments, what's the effect?**

What is the world thinking today?

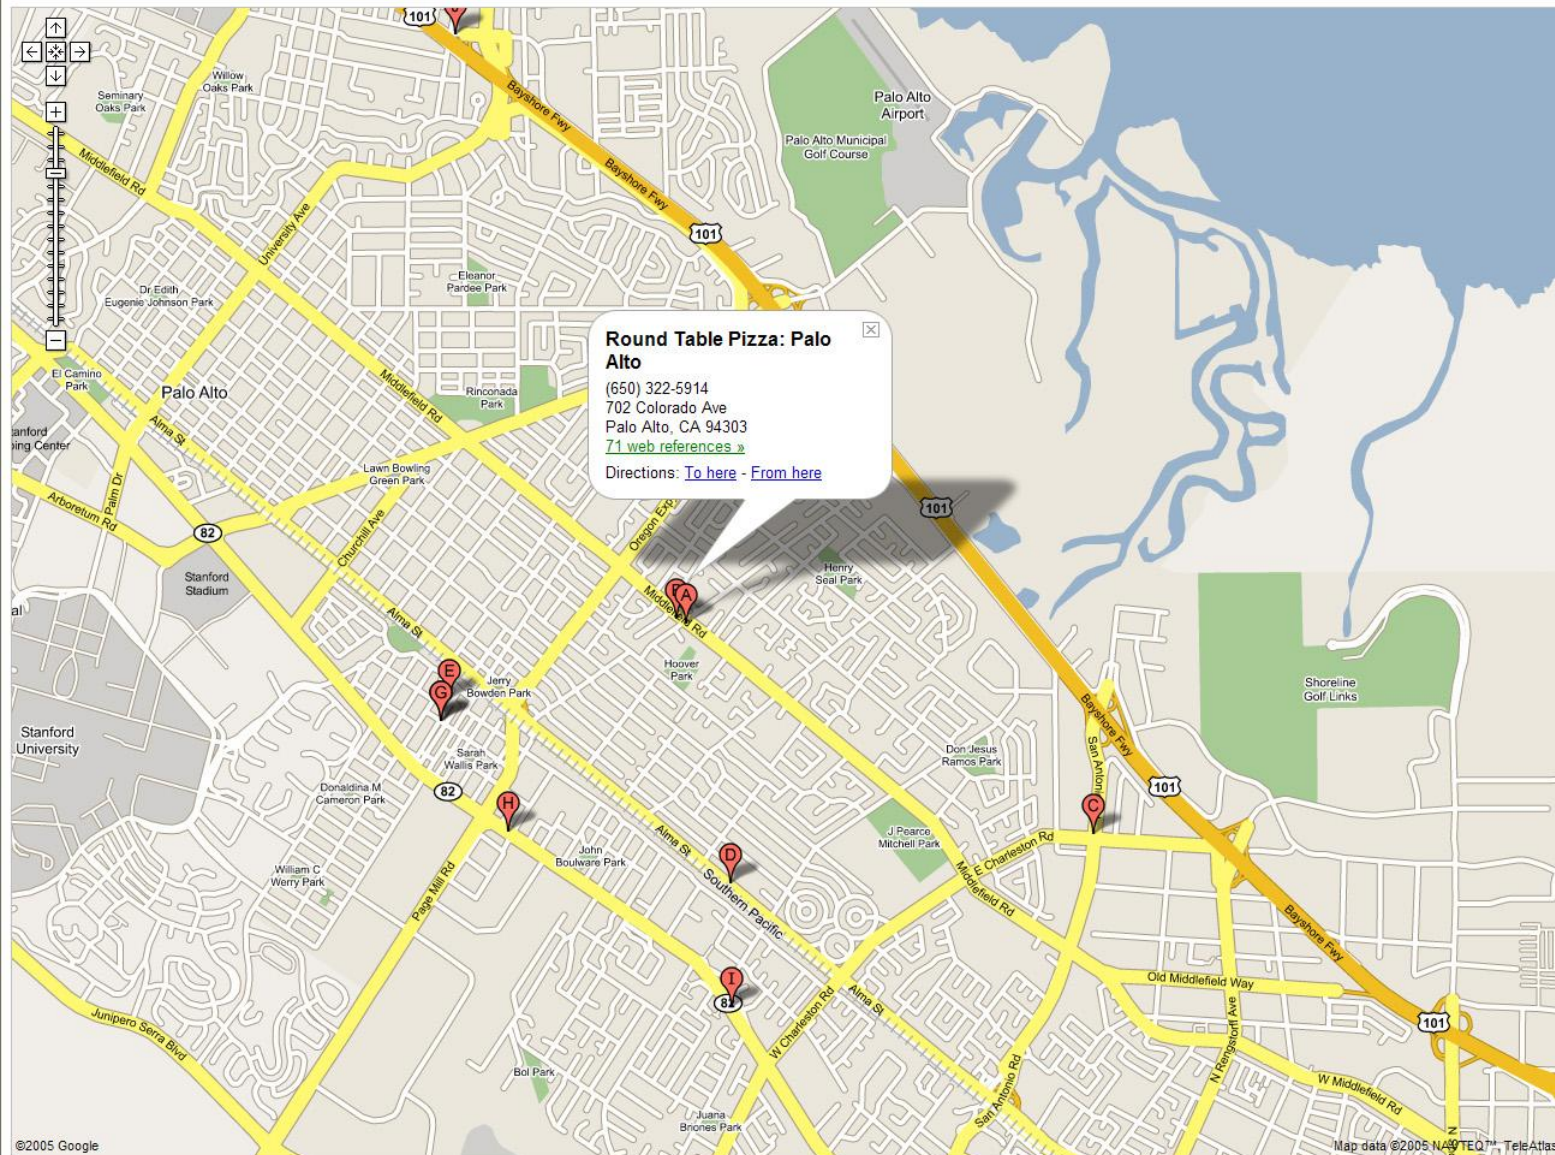

A regular Sunday:

A special Sunday:

4 years... many changes

In the UX, you live with a lack of knowledge

- ▶ **Often don't know what caused the effect we see:**
 - ▶ Was it the UI change?
 - ▶ Was it a seasonal effect?
 - ▶ Interaction with another experiment?
 - ▶ Is it due to content changing? (web content, ads...)

- ▶ **But with analytics, at least we have a chance!**

- ▶ **But...**

Run experiment... then.. .

- ▶ Some metrics up, some down...
- ▶ Things move together, things don't move
- ▶ Analytics data interpretation is still far from a science

Sources of lossage

- ▶ Cookie churn causes loss of individuals
- ▶ Same cookie can represent multiple people
- ▶ Each individual can have multiple cookies!
 - ▶ How many cookies have you searched with today?
 - (In this crowd, probably 5 or so...)

All the stuff that changes...

- ▶ Underlying logging infrastructure changes all the time too
- ▶ Often can't re-run an experiment because the web has changed, the logging has changed, the UI has changed...

... so where's your control?

“This scares me...”

The image shows the Google Advanced Search page. At the top, it says "Google Advanced Search" with links for "Advanced Search Tips" and "About Google". Below this is a search bar with a "10 results" dropdown and a "Google Search" button. The main section is divided into several categories of filters:

- Find results:** Includes options for "with all of the words", "with the exact phrase", "with at least one of the words", and "without the words".
- Language:** "Return pages written in" with a dropdown menu set to "any language".
- File Format:** "Only" return results of the file format with a dropdown menu set to "any format".
- Date:** "Return web pages first seen in the" with a dropdown menu set to "anytime".
- Numeric Range:** "Return web pages containing numbers between" and "and" with input fields.
- Occurrences:** "Return results where my terms occur" with a dropdown menu set to "anywhere in the page".
- Domain:** "Only" return results from the site or domain with a dropdown menu set to "e.g. google.com, .org" and a "More info" link.
- Usage Rights:** "Return results that are" with a dropdown menu set to "not filtered by license" and a "More info" link.
- SafeSearch:** Radio buttons for "No filtering" (selected) and "Filter using SafeSearch".

Below these filters are sections for "Page-Specific Search" (Similar and Links) and "Topic-Specific Searches" (listing various specialized search tools like Google Book Search, Google Code Search, etc.). At the bottom, it says "©2007 Google".

- ▶ Example from Bryan Eisenberg, www.clickz.com/showPage.html?l588161

What matters here?

▶ Big lesson: **EVERYTHING** matters

- ▶ *Color choice*
- ▶ *Visual complexity*
- ▶ *Text choice*
- ▶ *Vertical position*
- ▶ *Horizontal position*
- ▶ *Iconography*
- ▶ *Form, balance...*

The screenshot shows a Google search results page for the query "design analytics". The search bar at the top contains the text "design analytics" and a "Search" button. Below the search bar, the results are listed. The first result is "Design-Analytics « counternotions" with a star icon, followed by a snippet: "So my design and management practice has moved on to analytics/rules driven system design where such failure is assumed and thus automated out of existence, ...". The second result is "Web Design Analytics | Business.com" with a star icon, followed by a snippet: "Search for web design vendors who can implement analytics reporting to analyze user behavior on your web site.". The third result is "Analytics and inspiration » Design Thinking" with a star icon, followed by a snippet: "Oct 31, 2008 ... more from Tim, read his thoughts about analytics and design on his blog Design Thinking after the conference. Geoffrey". The fourth result is "[PDF] A Model of Online Instructional Design Analytics" with a star icon, followed by a snippet: "File Format: PDF/Adobe Acrobat by KW Fansler - 2005 - Cited by 3 - Related articles paper proposes a model of online instructional design analytics based on the use of log file analysis. 1. 20th Annual Conference on Distance Teaching and ...". The fifth result is "Construction & Design Analytics - Company Profile on LinkedIn" with a star icon, followed by a snippet: "Third-party due diligence services, construction-related project review, analysis and evaluation services for construction lenders. Risk assessment...". The sixth result is "Best Free Website Analytics Tools | Tools" with a star icon, followed by a snippet: "Web designers are often website owners. If you fall into this category, you have probably already realized the importance of knowing and understanding who ...". The seventh result is "DesignAnalytics: more than just pretty pictures" with a star icon, followed by a snippet: "Thoughtful design to take you to the next level, Print, Video & Web design solutions to help you break away from the pact. Technical support for the best ...". On the right side of the page, there is a "Sponsored Links" section with three links: "Google Analytics", "Design Analytics", and "See your ad here »".

Biggest counterintuitive surprise:

Not speed kills, but SLOW kills:

- ▶ 500 millisecond delay causes 20% drop in clicks
- ▶ 400 ms delay causes 0.6% drop in searches / user / day
- ▶ Effect is profound even for 100 ms

Role of design?

▶ **What it's always been:**

- ▶ *To help guide the design of the user experience*
- ▶ *We can't test everything, so we still need to make choices*
- ▶ *Skill of design is to make choices*

Role of analytics?

▶ **Newly emerging:**

- ▶ *To help guide the design of the user experience*
- ▶ *Test the variations that we don't understand*
- ▶ *Discover the counterintuitive*
- ▶ *Skill of analytics is to create a deeper understanding about why people act as they do*
